SINAN RAHMAN AK

ANGULAR & .NET DEVELOPER

+91 8129129641 | sinanrahmanak@gmail.com

ABOUT ME

Dedicated Software Developer with over 1 year of experience in developing and maintaining enterprise-level applications and ERP solutions. Skilled in Angular, C#, ASP.NET MVC, Entity Framework, and SQL Server, with a strong focus on frontend and backend integration. Proficient in integrating modern development workflows and AI tools to enhance productivity and code quality. Focused on building scalable, efficient, and user-friendly applications with dynamic UI components and reliable database architectures.

WORK EXPERIENCE

MESHILOGIC , KINFRA TECHNO PARK RAMANATTUKARA - KOZHIKODE

JUNIOR .NET & ANGULAR DEVELOPER | SEPTEMBER-2025 - PRESENT

- Developed and maintained enterprise-level web applications tailored for ERP solutions. Designed, tested, and implemented scalable web application modules with SQL Server as the backend, improving system efficiency.
- Focused heavily on the accounts module, creating responsive account-related pages and integrating various backend services to streamline financial data entry and management.
- Contributed to software issue resolution, session logic optimization, and UI enhancements, supporting continuous application stability and performance.

FINEDGE IT SOLUTIONS - CALICUT

DOTNET DEVELOPER INTERN | AUGUST-2025 - SEPTEMBER-2025

- Gained hands-on experience in C#, .NET Core, ASP.NET MVC, Entity Framework,SQL Server, HTML, CSS, and JavaScript through real-time web application development.
- Focused on enhancing frontend and backend basics, version control using Git and GitHub, and adopting modern development practices.

IEDC TECHNICAL HEAD & WORKSHOP TRAINER

- Served as the **IEDC (Innovation and Entrepreneurship Development Centre)** Technical Head during college, designing and conducting multiple hands-on workshops for students across various disciplines.
- Led interactive training sessions covering a diverse range of technologies, including Python programming, **Robotics**, **Internet of Things (IoT)**, and **Augmented/Virtual Reality (AR/VR)** development.
- Mentored students during hackathons and technical events in association with **ThinkerHub**, guiding them through complex problem-solving, project execution, and version control.

PROJECTS

BIZARABIA

INVENTORY MANAGEMENT ERP SOFTWARE

- **BIZARABIA** is a live product of MeshiLogic Software Consultants designed to handle sales, purchases, stock management, and accounting operations efficiently.
- My responsibilities included developing the accounts module using Angular and creating account-related pages. I researched and implemented a Dynamic Fields architecture, allowing UI forms to be generated automatically based on JSON configurations retrieved dynamically from the SQL Server database.
- Additionally, I implemented Multi-Level Drill-Down behavior in Angular reports, enabling an interactive navigation stack with state caching, allowing users to click on specific table cells to seamlessly navigate to detailed secondary reports without losing filter contexts.

ONLINE CAMPUS , TOTAL CAMPUS SOLUTION (TCS)
ERP SOFTWARE FOR SCHOOLS AND COLLEGES

- **Online Campus** is a live product of MeshiLogic Software Consultants, designed to simplify and automate school and college management operations**.**
- Utilizing .NET and HTML/Kendo UI and Telerik, I developed the HPC (Holistic Progress Card) report and created the necessary master pages for the module.
- Currently, I am part of the migration of the legacy Kendo UI application to the latest Angular framework with a .NET backend. I am actively utilizing Claude AI to assist with the UI conversion and accelerate the migration process. As part of this migration, I replaced the legacy Kendo reports with custom-built HTML reports.

VR-BASED HOME AUTOMATION SYSTEM & VR MUSEUM
UNITY & IOT PROJECTS

- **VR Home Automation:** Developed an immersive virtual smart home using Unity and the XR Interaction Toolkit. Users can control real-world appliances (like lights and fans) using VR hand-tracking and gesture-based interactions. Integrated real-time WebSocket communication between the Unity VR environment and an ESP8266 microprocessor to trigger physical devices seamlessly.
- **VR Museum:** Created an interactive, 3D virtual museum using the XR Interaction Toolkit, allowing users to naturally explore spaces via teleportation and interact with exhibits in a realistically lit environment.

UNITY 2D RUNNER GAME
GAME DEVELOPMENT

- Developed a 2D side-scrolling platformer in Unity featuring classic run-and-jump mechanics similar to Mario.
- Implemented core game systems including responsive player controllers, object pooling for performance optimization, dynamic scoring, and UI.
- Designed branching level pathways with varying difficulty routes (easy and hard paths) to provide diverse gameplay challenges and enhance player engagement.

EDUCATION

BACHELOR OF COMPUTER SCIENCE (B.Sc)
SULLAMUSSALAM SCIENCE COLLEGE [UNIVERSITY OF CALICUT] | **2022 - 2025**

TECHNICAL SKILLS

- **LANGUAGES :** C#, Python, Basic C++
- **WEB TECH :** ANGULAR, HTML5, CSS3, JAVASCRIPT,BOOTSTRAP,KENDO UI
- **FRAMEWORKS :** .NET MVC, Entity Framework
- **DATABASES :** SQL Server, Stored Procedures, JSON Integration
- **REPORTING :** Telerik Reporting, HTML Reports
- **AR/VR & TOOLS :** Unity 2D/3D, XR Interaction Toolkit

AI AND TOOLS

- Git, GitHub, Supabase, Visual Studio, VS Code, ChatGPT, Claude AI, Gemini AI, Google AI Studio, Google Antigravity

PROFESSIONAL SKILLS

- Problem Solving, Team Collaboration, Quick Learning, Debugging

LANGUAGES KNOWN : Malayalam, English, Hindi, Arabic, Tamil
